# TillageMax-Indy™

Pre-Innoculated high performance cover crop BLEND

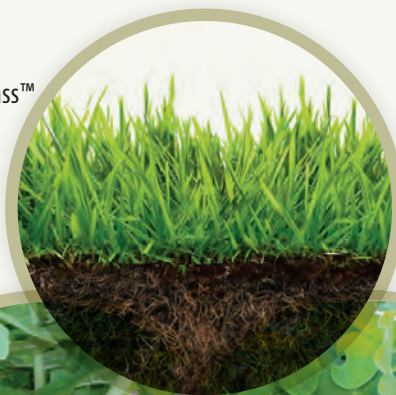

## KEY BENEFITS

- Increases yields and profits
- Improves soil health & fertility
- Scavenges nutrients, esp. nitrogen
- Reduces soil compaction
- Suppresses weed growth
- Enhances seed bed
- Reduces input
- Helps control nematodes

## What's unique about TillageMax-Indy™?

This blend provides a combination of deep soil tillage and yield improvements achieved only by Tillage Radish®, the soil building benefits of Deep Root Annual Ryegrass™ and the nitrogen fixing advantages of CCS Crimson Clover™. This is a high performance cover crop blend.

## PLANTING TIPS & SEEDING RATE

**Planting:** Plant 30 days prior to the first killing frost

**Seeding Rate:**

- **Drilling:** 15 lbs/acre
- **Broadcast / Aerial:** 17 lbs/acre

For more information or to find a dealer, call or visit:

**800-767-9441** [CoverCropSolutions.com](http://CoverCropSolutions.com)

*Available only from dealers carrying cover crop seeds produced by Cover Crop Solutions, Inc.*

LEADER IN COVER CROP SEEDS

# TillageMax-Bristol™

High performance cover crop BLEND

## KEY BENEFITS

- Increases yields and profits
- Improves soil health & fertility
- Scavenges nutrients, esp. nitrogen
- Reduces soil compaction
- Suppresses weed growth
- Enhances seed bed
- Reduces input
- Helps control nematodes

## What's unique about TillageMax-Bristol™ ?

Tillage Radish® sends an aggressive taproot deep into the soil where tillage steel cannot reach, penetrating compaction with thick channels 30" or deeper. This unique nitrogen storage tank holds N and other nutrients over winter, while suppressing winter annuals, protecting the soil surface and releasing nutrients as needed by following cash crops.

Tillage RootMax™ is the newly released Deep Root Annual Ryegrass™ that builds soil structure up to 80% deeper than many other ARG varieties. In combination, this is an outstanding cover crop mixture and will provide added cover in the spring prior to burndown.

# TillageMax-Daytona™

Pre-Innoculated high performance cover crop BLEND

## KEY BENEFITS

- Increases yields and profits
- Improves soil health & fertility
- Scavenges nutrients, esp. nitrogen
- Reduces soil compaction
- Suppresses weed growth
- Enhances seed bed
- Reduces input
- Helps control nematodes

## What's unique about TillageMax-Daytona™?

Tillage Radish® is the only proven yield-boosting cover crop radish, and absorbs soil nitrogen and other key nutrients with its unique taproot that grows 30" and deeper.

CCS Crimson Clover™ converts atmospheric nitrogen into plant available nitrogen, helping reduce fertilizer input while improving soil health by adding organic matter. This is a high performance cover crop blend.
