

How does it work?

Weed response to forage radish residues

Experiment	Percent weed cover in late April			
	No cover crop	Forage radish	Remove forage radish	Double forage radish
Site 1	53a	0b	0b	0b
Site 2	71b	0b	0b	0b

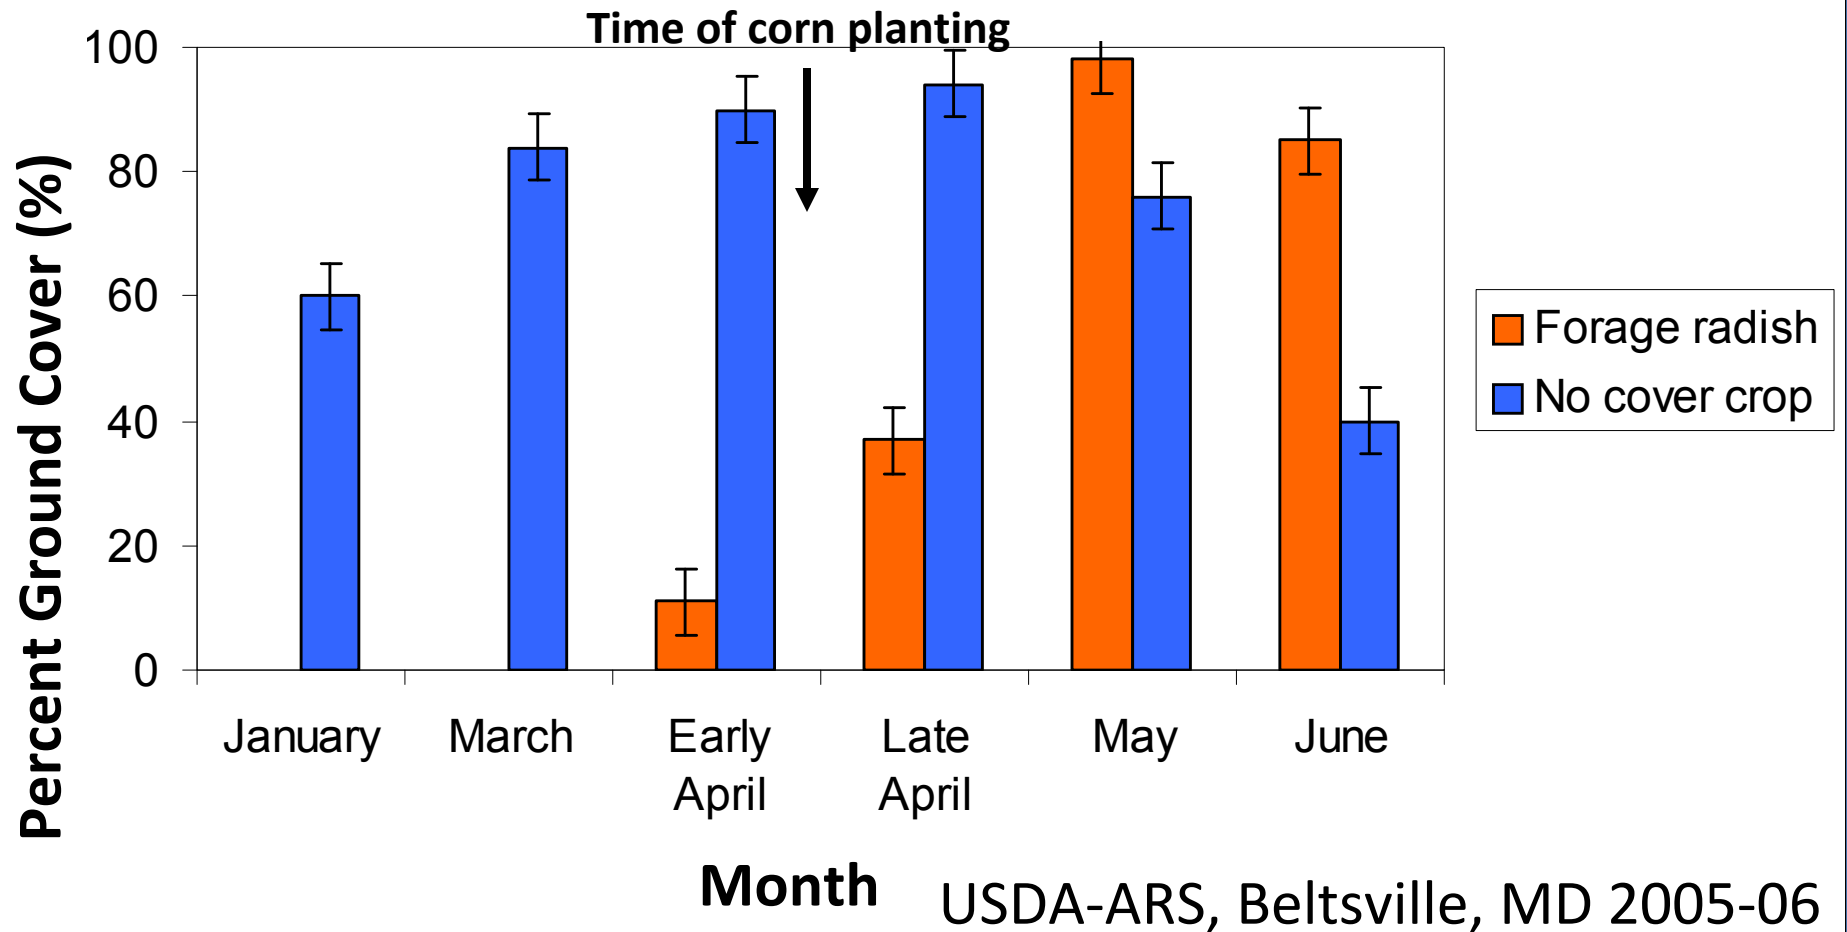

Means followed by different letters are significantly different ($\alpha=0.05$)

How much suppression is there?

Mean percent weed cover

Month	Site 1		Site 2		Site 3	
	Forage Radish	No Cover Crop	Forage Radish	No Cover Crop	Forage Radish	No Cover Crop
November	0	40	0	83	0	95
January	0	60	0	88	0	87
March	0	84	0	39	0	71
April	37	95	19	53*	2	71*

How long does it last?

Radish plot in early April

Weeds outside the radish plot
