

But how much will tillage radishes increase my yields??

University of Maryland research indicates an 8-12 bushel corn yield increase can be expected after planting tillage radishes the previous fall.

Tillage Radish cover crop 2.5 acre demonstration plot

Corn Yields

| | |
|----------------------------------|--------------------|
| No cover crop | 180 bu/acre |
| Barley cover crop | 193 bu/acre |
| Tillage Radish cover crop | 221 bu/acre |

41 bushel increase!
